## Eurovent EAVES PLANK

### Storage / transport:

The product should be stored in a dry place, under cover, free from moisture and UV radiation in original undamaged and closed package. The plank is made of an aluminum sheet of metal, which under severe weight could deform. Therefore please refrain from stacking the product under other heavy products (this includes both in transport and storage). The plank should be transported in covered means of transport. They should be prepared for transport in a manner that protects them from damage and destruction. During transport safety regulations must be preserved. The product should be protected from chemical substances, in particular solvent-based materials, as they can reduce the technical parameters of the product.

The product is under warranty, providing that the guidelines contained in technical data sheet are being obeyed. We reserve the right to refuse a complaint recognition in case of not following these guidelines.
